

Bond Projects: Guiding Principles

The following themes guided our decision-making during the extensive design process associated with the construction and renovation projects:

Academic program:

- classrooms and common areas designed to enhance instructional activities and delivery of services

Safety and security:

- facility layout promotes a safe feel

Sustainable design:

- energy efficiency and conservation

Technology integration:

- technology capabilities expands learning opportunities

Value to the community:

- facility improvements are a source of pride for Sylvania residents and create additional opportunities for community use

Fiscal stewardship:

- design components emphasize quality and value to maximize the use of public funds
